MAC 2312 - Rules for *Take-Home* Extra Credit Problems

Occasionally, I may give you the opportunity to earn some extra credit by doing some problems at home. Here are the rules for take-home extra credit problems.

1. Each take-home extra credit problem must be done solo. This means that you CANNOT receive assistance from any human being.

2. You can use your notes and/or any book. You can also use the internet.

3. You must turn in the solution to each take-home extra credit problem by the beginning of class on the due date. Late solutions will not be accepted under any circumstances.

4. The amount of take-home extra credit that you earn will be added to your highest non-final exam grade.
